INSTRUMENT LANDING SYSTEM

Systems Interface was awarded a contract by Kerry Airport in 2018 for the installation of an ILS System for our main runway 26.

Systems Interface worked closely with the Kerry Airport engineering and Safety Management team and the project was professional managed and delivered on time and within the appointed budget.

We were extremely pleased with the Systems Interface team work and positive attitude to the project and have engaged the company to undertake additional projects for 2019.

Yours Sincerely,

Howard Jones,
ATM Manager,
Kerry Airport.
