Solar Aviation Light

AV-70 and AV-70-HI

Automatic night activation

Tough UV-stabilised LEXAN® polycarbonate lens and light base Dual internal high-performance solar modules

LED aviation lens with 0 to +7° vertical divergence

User-replaceable battery in sealed battery compartment

The solar powered AV-70 is a field proven aviation light that offers enormous benefits over traditional battery and hard-wired aviation lights including low maintenance and no underground wiring.

These completely self-contained LED lights are designed to suit a range of aviation and general applications including emergency airstrip, caution, taxiway, and threshold lighting.

The unit has two high-performance solar modules mounted within the lens, which maximize solar collection and provide reliable operation in a range of environmental conditions.

The focal plane of the light is designed to provide a vertical divergence of between 0 to +7 degrees, and the user-replaceable battery ensures a service life of up to 12 years.

AV-70

The AV-70 is made from tough, durable UV stabilized LEXAN® polycarbonate, and incorporates an internal photodiode for automatic night activation once the ambient light threshold drops sufficiently.

Completely self-contained and able to be installed in minutes, the AV-70 is the preferred choice for marking of indigenous, regional and mining airstrips around Australia, and remote airfields globally.

AV-70-HI

The AV-70-HI is a high intensity version of the popular AV-70 and is ideal for use in high sunlight areas.

Optional Radio Control

The AV-70-RF is a radio-controlled version of the popular AV-70, which can be used in conjunction with a PALC or simple handheld controller. Users can wirelessly control ON/OFF functions, adjust light intensities or switch between visual and IR (tactical) operational modes if fitted.

\$ Cos

Cost Effective

- Solar Powered
- No running costs
- Low ongoing maintenance costs

Easy Install

- No trenching of cables
- No mains p ower

• Reliable

- No bulbs blown ever
- Latest LED technology
- No Moving parts

(w)

High Performance

- Fully integratable into an Avlite runway lighting system
- Dusk-to-dawn or on demand operation

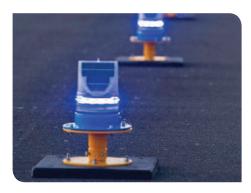

Optional Add Ons

- Infrared Output
- Radio Control
- Mounting Solutions

*

Applications

- ICAO and FAA Compliant
- Runway threshold/end
- Runway Edge Light
- Taxiway Edge Light
